WE CLOSE TOMORROW AT NOON.

I REMEMBER now how my friends used to tell me about Prince Albert; how they would make what sounded like the most extravagant claims for it; and how I would say "Uh-huh," and proceed to fill my pipe from the same old package. I

But I found out. One day, the store where I buy my tobacco didn't have my old brand. I heard another customer standing beside me say "Prince Albert" to the man behind the counter. All that I had heard about Prince Albert came back to me in a flesh.

I bought a tin. "Took a chance," as I thought. As I opened it, I was met by the most inviting fragrance I had ever known. I thought of the woods after a gentle rain. It made my mouth water for a taste of such tobacco in my pipe.

What a taste! Cool and sweet and mild, with just enough body to make every puff a smoke-experience. I tried another load -- and another. I was "rold." P.A. was my brand from then on. My only regret is that I didn't make the discovery somer. Good aid P.A.I

HAROLD G MOULTON.

Harold Glenn Moulton and born at Leroy Mich gan November 7 1853. He was connected with the department of political sconnent at a University of Chicago for a number of years rising to professor in 1922. Since that time he has been director of the Institute of Frunomics Washington. Dr. Moulton is the author of a number of volumes on economics and a contributor to scientific and popular journels.

Mr. Moulton holds that the reparations at terms was distatrous which will be conceded as quickly as there will be agreement that the war was disastrous. Has says.

While the Central powers suffered comparatively little deseastation they did I believe suntain the heaviest indirect losses in connecting of waging war almost entirely out of their own resources subjected their financial and economic authors. The losses of territory and of

nomic spelems. The loases of territory and of prewer markets in elastern burone were also of at importance It was from these ill prepared continental

nations that payments had to be made nations that paymonts had to be made which would esentually so almost entirely to the United States since Great British in the matter of war debts acted merely as a transfer agents having pledged itself to collect only as much as it was obliged to pay the United States

The attempt to restore the world to health The attempt to restore the world to health and prosperits by starting a flow of wealth from central Europe and theese to the United States proved utterly disastrous. The Gorman financial and economic systems broke down and the bation went into the hands of foreign receivers to to speak. The reparation policy that was pursued an avoidable though it may have been in the light of the prevailing state of world psychology and of economic knowledge unquestionably delayed the whole process of reconstruction for a period of at least four years.
